The Bulgarians had taken the city of Thessalonika, the Turkish front, and the Bulgarians were turning to cover the line of retreat over Thessalonika and Thessalonika. This change of front the Bulgarian plan to cut off the Turkish army was checked, but as the Turks made the attack before their army was properly grouped, the Bulgarians had an opportunity to defeat the Turkish line, once completely in the jaws of Lake Burgas.

The Bulgarians had taken the city of Thessalonika, the Turkish front, and the Bulgarians were turning to cover the line of retreat over Thessalonika and Thessalonika. July 7, 1887, he was proclaimed Prince of Bulgaria at Tynovo.

His adventures began before he got to Sofia. While in Vienna there were rumors that came to his ears of Austrian hostility. By night Ferdinand left Vienna, travelling in haste. He arrived in Bulgaria, where at best was a poor country then. The nation was usually in readiness to Turkey. There were factions in the national politics, and bitter strife. Russia, Prussia, France, refused to recognize him as the Bulgarian ruler.

When still, the army was torn with dissension. Ferdinand had simply swallowed up his enemies, territory and killing at will. Conditions could hardly be more discouraging. But Ferdinand was the man for the job. The Bulgaria of today, in every well ordered and powerful, its government, its strength and its position as one of the great states of the Balkan States, are all the result of Ferdinand's twenty-year reign of hard work.

As a diplomat, Ferdinand has again and again won the approval of his subjects. He is the only ruler in the Balkans who has been able to give that great diplomat run.

The model is the same in both dresses and in an adaptation. Two in a French model—the new long shoulders and long sleeves, now shaped skirt in long coat effect with large self-covered square buttons and self-covered seams; collar and cuffs and entire front trimmed with mottled velvet; fur-trimmed cape; fur-trimmed shirred drape in skirt.

The eponge used in these dresses is almost imported, although there is some from one of the most celebrated domestic manufacturers. The velveteen is an English make.

Colors—Brown, taupe, gray and white.

Note. The velveteen dress has, in addition, a high fur collar.

This model, produced by a skilled manufacturer of dresses, has the same effective outline and the same perfect fitting qualities of the original French model.

For style, comfort and service they are the best shoes in this city for the price.

Boys wear W. L. Douglas shoes because one pair will positively outwear two pairs of ordinary shoes, same as the men's shoes.

Look in W. L. Douglas store windows and inspect the very latest fashions, notice the short ramps which make the foot look smaller, points in a shoe particularly desired by young men and women. Also the combs which have made W. L. Douglas shoes a household word.

If you could see W. L. Douglas large factories at Brockton, Mass., you would be amazed to see how the shoes are made. They are so perfectly made that they are warranted to fit better, look better, and wear longer than any other make for the price.

## IVES ATTACKS FREIGHT RATES

Further investigation by the Interstate Commerce Commission into the alleged freightage delays experienced by shippers on the Boston, New York and New Haven railroad, by order of Chairman Charles A. Frost, has been postponed until Monday, November 18. The work then will be taken up by an examiner for another week's hearing, and complete the investigation on December 10, 27 and 28.

It is known, transportation expert of the Boston Chamber of Commerce, was the principal witness immediately before an argument was taken. His testimony was made up of statements of rates from Boston to nearby cities. By comparing those rates with those charged for Western cities for equal distances, it was shown that shippers in New England were overcharged on iron, coal and other staple commodities.

Mr. Frost also showed how, since the New Haven last summer's possession of a large stock of the Merchants and Miners Transportation Company stock, the all-water freight rates to Philadelphia have been raised from thirty to thirty-five cents. Also, that rates to New York are as high as the all-rail rates in the same city. This he held to be an injury to Boston, although R. L. Burdick, vice-president of the New Haven, contended that his road was not in any way responsible for the advance.

## DEFIES INGE IN HARVESTER SUIT

CHICAGO, Nov. 1.—Hearings in the government's dissolution suit against the Ingersoll Harvester Company, which is a master here today, Cyrus Bentley, general manager of the company, refused to testify as to New York conference prior to the motion of the company to the ground that the information had come to him in the capacity as a lawyer, and so was privileged.

Details of the methods by which the company was created were related by John D. Gossamer, a vice-president and director of the corporation.

Mr. Gossamer told his audience in New York to talk with George W. Perkins about the sale of the property of the company, and to ask for the name of the "Champion" line of harvesters.

He made a dramatic trip to the first hearing. "On the first day, I told him we would sell it if we got what we thought the property was worth. He said he would give us stock in the new company and part cash."

"We accepted the terms and the transfer of our stock was made in William C. Lane, July 20, 1902."

## QUIT CALOMEL!

Thousands are turning from this dangerous drug.  
A Safe Vegetable Substitute in Olive Tablets for the Liver.

Dr. F. M. Edwards, a prominent physician of Ohio, has discovered a new laxative and liver tonic in a combination of vegetable materials, mixed with olive oil, which is an efficient and safe laxative and liver tonic. It is not only safe, but it is also effective. It is not only safe, but it is also effective.

RIKER-JAYNES DRUG STORES

You are SAFE when you buy at Riker-Jaynes

Cut prices originated in New England when the first Riker-Jaynes store (then known as "Jaynes") was opened on Washington St., in Boston, 29 years ago.

Since then, year after year, overcoming all obstacles, we have consistently maintained the lowest prices on all drug store goods, setting the pace which other dealers must follow.

By featuring cut prices persistently, by cutting our profits down to the smallest margin possible, depending rather on a small profit from many customers than on exorbitant profit from a few, we have brought about a condition where cut prices on drugs are recognized as an established fact.

No person today would without strenuous objection pay the prices which the Riker-Jaynes Stores have been instrumental in destroying. No druggist anywhere would have the effrontery to ask the full retail prices for these goods.

Riker-Jaynes methods adopted by the founder of our business at its start and followed by us through three decades have meant a saving of hundreds of thousands of dollars to New Englanders.

With your continued support in the years to come we propose to pursue the same policies which have proven so eminently successful to us and a source of great saving to you. We promise that drug store goods will always be sold in New England at lowest prices possible.

Benjamin Clothes

**ALFRED BENJAMIN & CO., New York**, makers of the famous "Benjamin" Clothes, point with pride to their enviable record of twenty-five years as tailors to young men. Young men are the exacting men of the trade today, and any laxity of style or construction in "Benjamin" garments would meet with instant disapproval.  
"Benjamin" Clothes are advocated by college men—business men and men all over America who appreciate the superiority of their styles—of their fabrics, and of their tailoring.

To better illustrate their meaning Wm. H. Richardson & Co. invite attention to the splendid models they are displaying.

The buyers of the big stores—Department Stores, Clothing and Men's Furnishing Stores—admit that Bristol Underwear is, by all odds, "the best in the market at the price."

These buyers know underwear quality. They know that all Bristol Mills garments are made of fine-gauge, close-knit yarns (not the coarse-knit, coarse yarns ordinarily found in 50c and \$1.00 underwear) and that they give warmth and durability without excessive weight.
